

External Side ashtray is safe and nice way to serve also the smokers. The small 25mm aperture together with tight construction keeps cigarette smoke inside the ashtray. As the ashtray is totally apart from the litter bin it also increases fire safety. The ashtray is emptied through locked bottom hatch. Same ashtray fits all CT-litter bin sizes 30, 60 and 100 and all bins have perforated installation holes for the ashtray on their hinge side so you can add the ashtray into bin already in use.
