

Portable information sign that can be attached to existing lamp posts or screwed up on a wall. Length 263 mm, width 20 mm and height 302 mm. There should be a sign on the playground with information and address information such as the address and the coordinates of the playground in the event of an accident. It also indicates who owns and manages the playground, and how to get in touch with them. Jim is an easy-to-mount information sign for e.g. playgrounds, sports parks and other public areas. Info sign for the playground is recommended in the EN1176.
